ILCAN Training Series on Life Cycle Assessment 2018

INTRODUCTION TO LIFE CYCLE ASSESSMENT & TOOLS

The Indonesian Life Cycle Assessment Network (ILCAN) in collaboration with Life Cycle Indonesia.

November 2018
(To be updated)

Time 9 AM - 4 PM
Location Hotel Santika Premiere Slipi Jakarta

Life cycle assessment and life cycle perspectives has started to be implemented in many ways in Indonesia, such as through:

- Sustainable Development Goal 12: Sustainable Consumption and Production,
- The new version of Environmental Management Systems ISO 14001:2015,
- As a tool to define materiality in GRI Sustainability Reporting Standard
- Ecolabel, green labelling, sustainable development tools,
- The SNI on Life Cycle Assessment

Very soon everything will be based on life cycle perspectives and industry has to adapt with the new perspective.

ILCAN is a voluntary initiatives with the mission to develop capacity building of its members and Indonesian industry. It consists of a pool of experts of LCA in Indonesia from different sectors, who will contribute their knowledge in this training sessions. Life Cycle Indonesia, whose founder is also an active member and board of ILCAN, is a sustainability consulting firm and Global Network partner in Indonesia for SimaPro, a leading LCA software. Together they will deliver you a three-day full on course on the Introduction to LCA and tools.

The course will cover a step-by-step guide on conducting LCA, case study on specific sector, and hands on tutorial to SimaPro, a leading software for LCA.
